

TEA TREE ESSENTIAL OIL

The tea tree (*Melaleuca alternifolia*) is a small Australian native tree growing to around 7 metres. It grows along streams and in swampy places in New South Wales and Queensland. The essential oil is extracted from the leaves and stems using steam distillation. With its distinctive medicinal aroma tea tree essential oil is invigorating and is purported to be useful for repelling insects.

Botanical Name	<i>Melaleuca alternifolia</i>

Lemon Myrtle	4
Tea Tree	3
Frankincense	2
In a Vaporiser	

*Quantity shown refers to number of drops of essential oils

Cautions

Possibly sensitising to some users. Toxic if swallowed in large amounts.

Store in amber bottles only. Tea Tree oil has been shown to change and oxidise if stored in clear glass bottles. The oxidised product is a potent skin irritant. No such oxidation occurs when kept in amber bottles.

Keep out of reach of children. If you are pregnant or nursing consult your doctor for advice before using any essential oils.
